Versiclad

LumeX
Skylight System

Premium skylight for Versiclad roofs

Let your outdoor space shine

Taking advantage of natural light to brighten your outdoor oasis has never looked better thanks to Versiclad's LumeX Skylight System.

The Lume**X** Skylight System is an alluring solution that provides a vibrant outdoor experience by inviting natural light in while minimising UV transmission. It is ideal for a range of applications including patios, carports, awnings and gazebos.
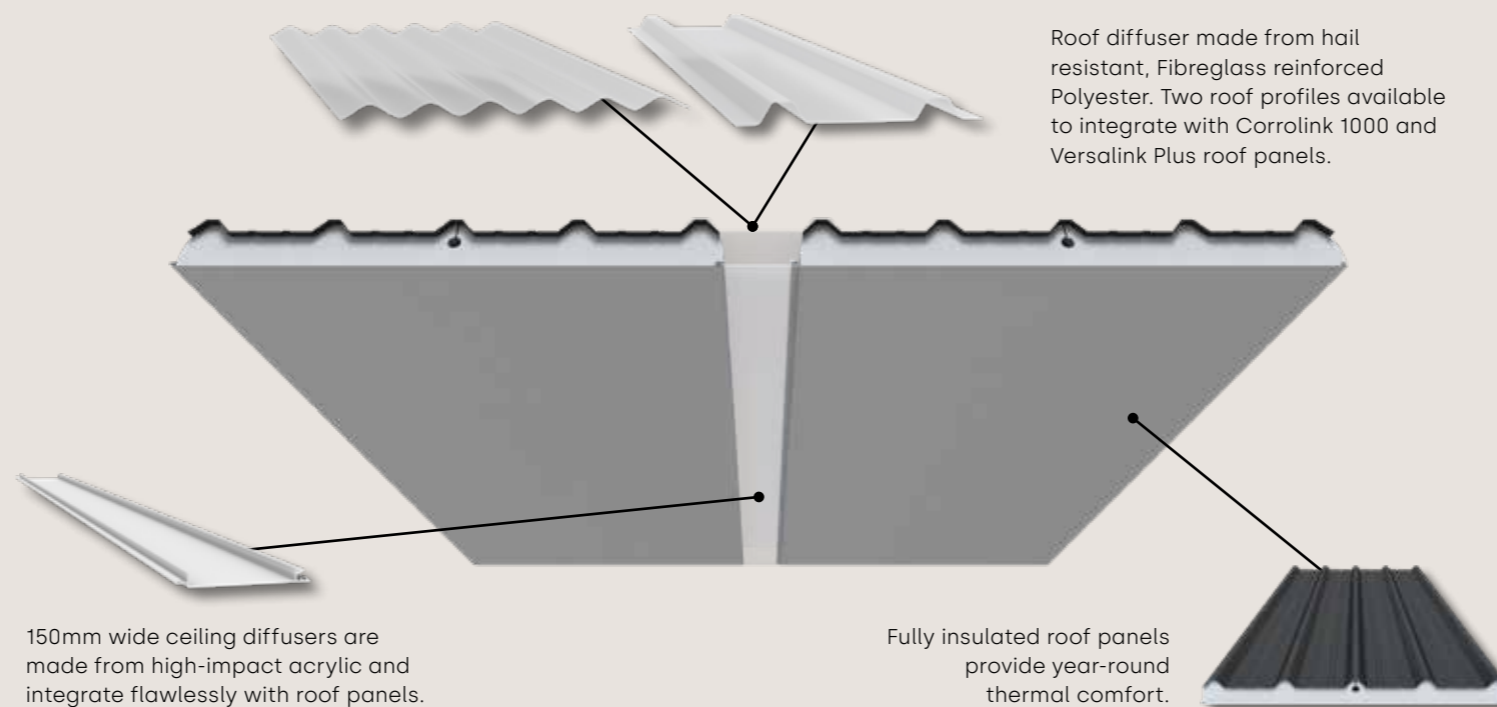

Maximise the light, inside and out

Lume**X** Skylights will help to create the prefect environment for outdoor living by inviting natural light with a warm and dynamic quality that artificial light doesn't provide. For outdoor spaces attached to your home, this will allow for a seamless connection between indoor and outdoor living.

Elevate your outdoor design

Skylights are a stylish and impactful way to visually enhance your home. By brightening your outdoor area, Lume**X** skylights will make it feel more expansive, luxurious and radiant.

Enhanced comfort

Our Versalink Plus and Corrolink 1000 roof panels work to effectively minimise heat transfer in summer and condensation build-up in the colder months. When seamlessly integrated with LumeX Skylights, our complete roofing system will ensure a vibrant, stylish and comfortable environment year-round.
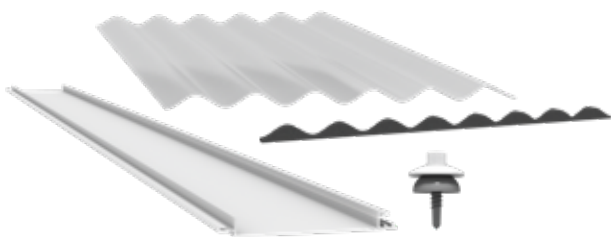

Roof diffuser made from hail resistant, Fibreglass reinforced Polyester. Two roof profiles available to integrate with Corrolink 1000 and Versalink Plus roof panels.

150mm wide ceiling diffusers are made from high-impact acrylic and integrate flawlessly with roof panels.

Fully insulated roof panels provide year-round thermal comfort.

✓ Made in Australia for Australian conditions

✓ Reduces up to 99% of UV transmission

✓ Roof diffuser constructed from hail resistant, Fibreglass reinforced Polyester and backed by a 25-year warranty
