Signature Skylight System

Premium skylight for Versiclad roofs

Let your outdoor space shine

Taking advantage of natural light to brighten your outdoor oasis has never looked better thanks to Versiclad's Signature Skylight System.

The Signature Skylight System is an alluring solution that provides a vibrant outdoor experience by inviting natural light in while minimising UV transmission. It is ideal for a range of applications including patios, carports, awnings and gazebos.

Maximise the light, inside and out

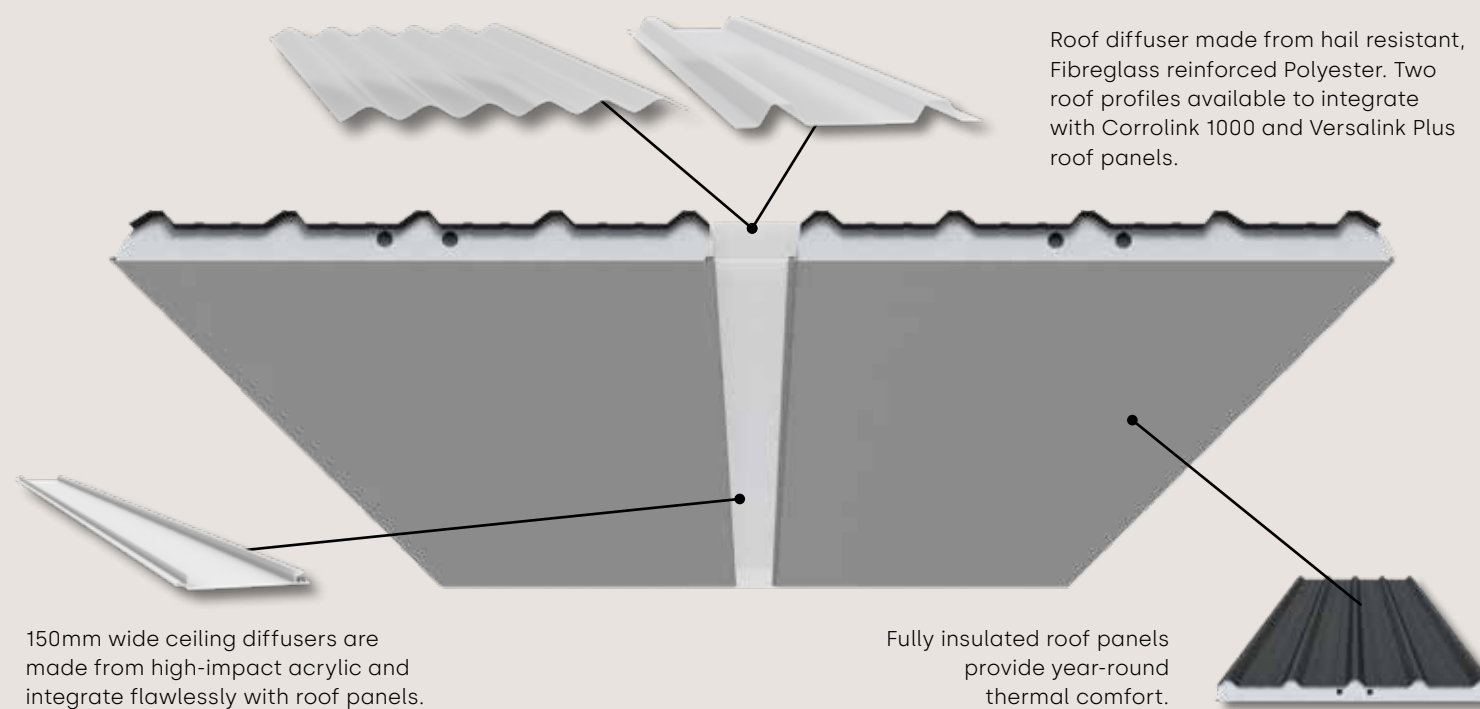

Signature Skylights will help to create the perfect environment for outdoor living by inviting natural light with a warm and dynamic quality that artificial light doesn't provide. For outdoor spaces attached to your home, this will allow for a seamless connection between indoor and outdoor living.

Elevate your outdoor design

Skylights are a stylish and impactful way to visually enhance your home. By brightening your outdoor area, Signature Skylights will make it feel more expansive, luxurious and radiant.

Enhanced comfort

Our Versalink Plus and Corrolink 1000 roof panels work to effectively minimise heat transfer in summer and condensation build-up in the colder months. When flawlessly integrated with Signature Skylights, our complete roofing system will ensure a vibrant, stylish and comfortable environment year-round.

- ✓ Made in Australia for Australian conditions
- ✓ Reduces up to 99% of UV transmission
- ✓ Roof diffuser constructed from hail resistant, Fibreglass reinforced Polyester and backed by a 25-year warranty
- ✓ Ceiling diffusers moulded from high impact acrylic
- ✓ Available in kit sizes from 3m to 8m
- ✓ Ideal for patios, awnings, carports and gazebos

Compatible roof panels

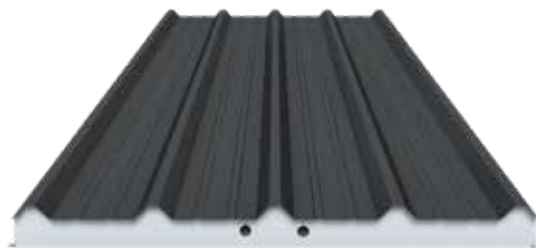

Signature Skylights are available to integrate with two of Versiclad's roof panels

Corrolink 1000

With its corrugated roof profile and multiple ceiling options, Corrolink 1000 is a versatile roof panel that suits a variety of outdoor designs. It is quintessentially Australian in both design and performance, able to complement existing metal roofs and providing an unmatched level of thermal comfort under Australian conditions.

Versalink Plus

Versalink Plus is the ultimate solution for modern homes thanks to its contemporary design. Cleverly engineered without roof laps, Versalink Plus delivers unmatched ease of installation by removing the need to cut away laps on site. And thanks to its 1100mm ceiling coverage, Versalink Plus often requires one less panel to be purchased and installed, helping to reduce cost.
